GLOVE SIZING CHART

Measure the width of your hand from point A to point B to match your correct size. For a more precise fit, measure the length by the indicated points. If you are between sizes, we recommend sizing down for a more snug fit.

Size	Medium	Large	X-Large
Width	76mm-86mm	86mm-98mm	98mm-111mm
Length	130mm-136.5mm	136.5mm-146mm	146mm-152mm

EN388 GLOVE STANDARD RATING EXPLAINED

This is displayed on the glove with the pictogram above. The ABCDEF will indicate the performance levels of the glove for each risk indicator. The higher the number or letter, the greater the protection level. The standard is only applicable if the gloves meet at least level 1 or level A for at least one of the EN388 protective categories.

- A = Abrasion Resistance
- B = Circular Blade Cut Resistance (Coupe Test)
- C = Tear Resistance
- D = Puncture Resistance
- E = EN ISO Cut Resistance
- F = Impact Protection

WHY CHOOSE MAKITA GLOVES?

**PURPOSE BUILT.
PRODUCTIVE PROTECTION.**

Makita tools and accessories have the power and performance for professional applications, with comfort and ergonomics for all-day use – and Makita High Performance Gloves are a natural extension of this engineering legacy. From comfort, fit and dexterity to protection and durability features for harsh job site conditions, each Makita Glove meets the needs of the most demanding professional. Makita High Performance Gloves have the right fit for the job, wherever the job takes you.
